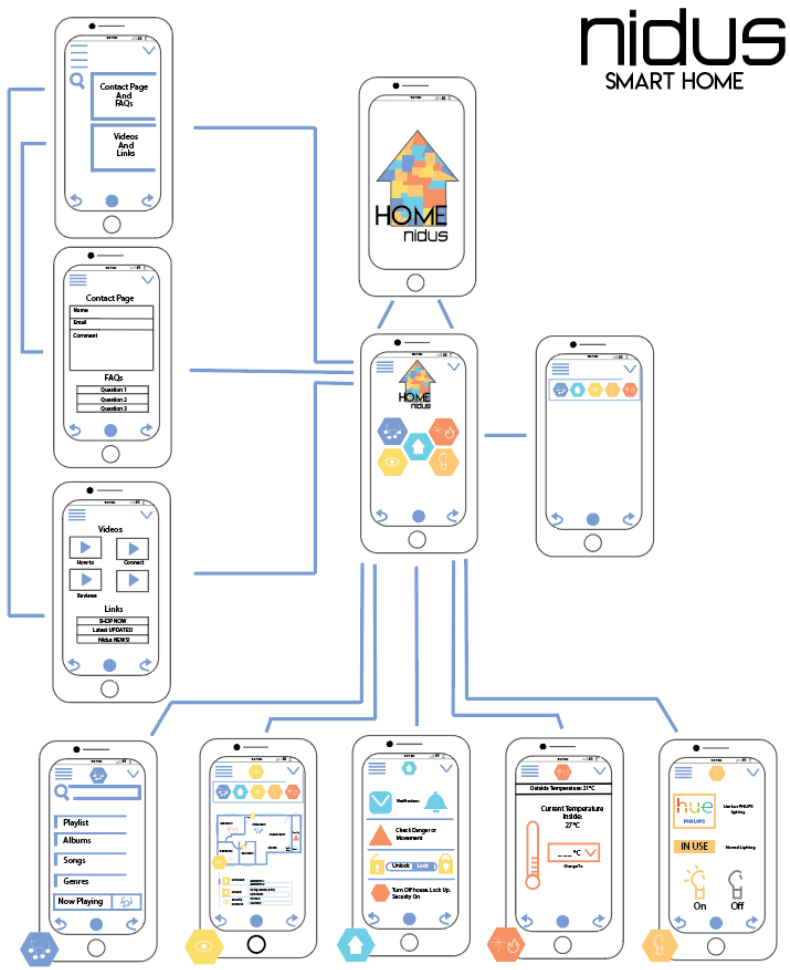
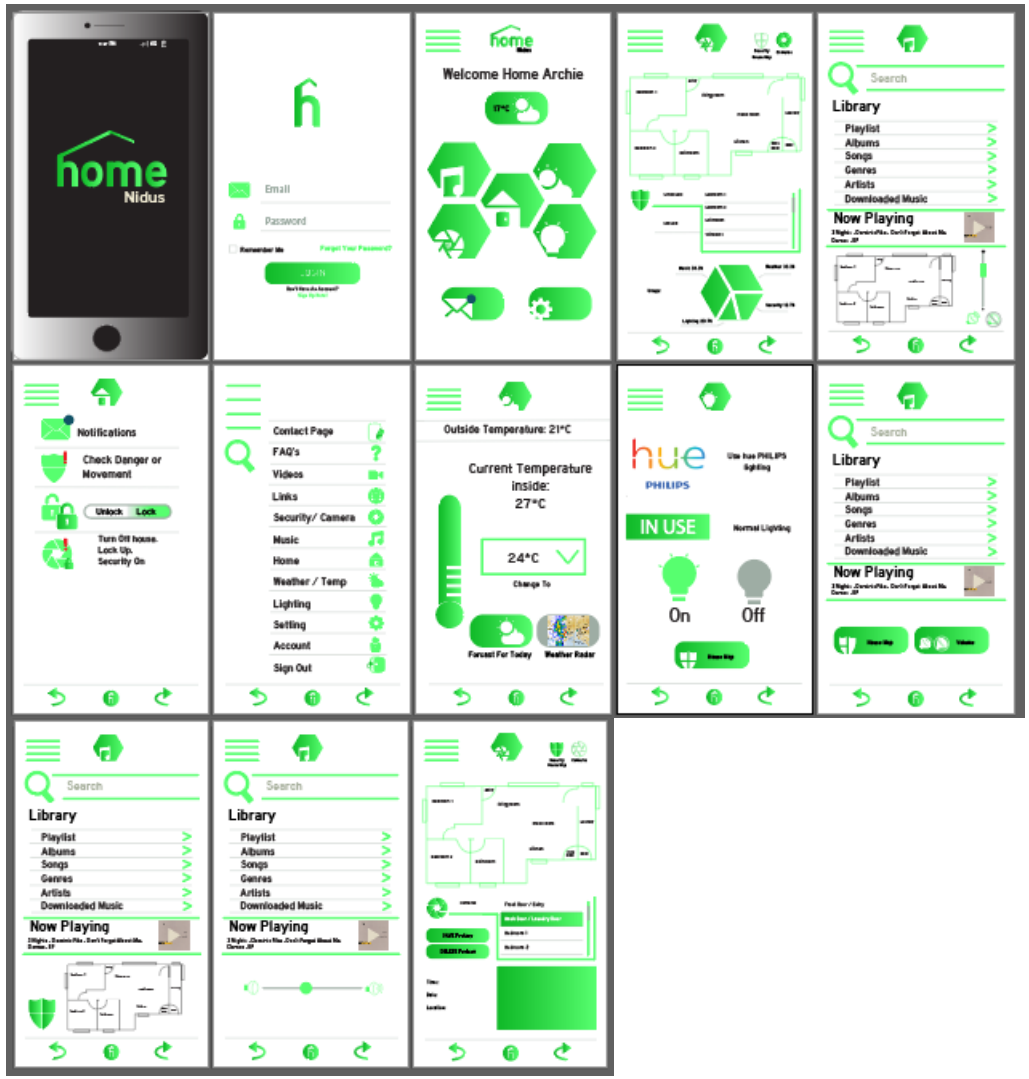
Design User Experience / Assignment 3 / Emily Davitt / STUDENT ID: 218252132

Development:



This wire framing shows the start of the idea for making Nidus Smart Home app

The colours were then changed to be more of a theme of good, safety and a calming colour.
The change of the icons, and logo design shows more aim to the app and the content that it'll demonstrate.



This design is developed from being a coloured solid green to a gradient with 2 different shades of green.
But the app pages have also been developed and changed.

In the development of the app, grids and rulers have been included to give a visual flow to the app and not look sloppy.
The colour changes give a more realistic feel to the app and also shows the app being put together.
